

Waterproof Green Grease

Waterproof Green Grease™ is a professional-grade, high performance synthetic polymer grease developed for mining, manufacturing, marine and off-road. Recommended for cars, trucks, boats, trailers, ATVs, motorcycles, mowers, farm equipment and implements – any application up to 500° F.

Ideal for general chassis lubrication, including U-joints, tie-rod ends, upper and lower A-arms, CV-type driveshafts, ball/roller and sealed-for-life bearings. Handy for hinges, pool equipment, seals, gaskets, O-rings and more. Used in extreme environments for over 25 years, Green Grease lasts longer than ordinary grease, provides superior parts and equipment protection, and is compatible with lithium and petroleum-based greases.

- **Exceptional operating temperature range:** Green Grease meets or exceeds major manufacturer performance requirements.
- **Tenacious synthetic polymers** resist high impact, shock loads, wash-out and centrifugal separation.
- **Special EP compounding** helps prevent wear under heavy-duty conditions.
- **Waterproof:** Green Grease acts as a rust preventative and protects bearings, seals and open gears against costly wear. Repels fresh water or saltwater!

Specifications:

NLGI GRADE #2	
COLOR: Green	BASE TYPE: Mixed complex
WIDE OPERATING TEMPERATURE RANGE	DROP POINT: Over 500° F
TIMKEN OK LOAD: 80 Lbs.	FOUR BALL E.P. WELD LOAD KG: 800 Kg. +

Packaging:

14 oz. Green Grease	Description	SKU No.
14 oz. cartridge	Single plastic cartridge	SKU101
14 oz. box	Box of ten single cartridges	SKU1003
14 oz. case	Five ten-count boxes	SKU1503
14 oz. 3-pack unit	Three cartridges & two shop towels	SKU103
14 oz. 3-pack case	Twelve 3-pack units	SKU1103
3 oz. Green Grease		
3 oz. 3-pack unit	Three 3 oz. traditional cartridges	SKU203
3 oz. 3-pack case	Twelve 3-pack units	SKU1203
